

UNIVERSKIN

Universkin introduces nexultra O, a revolutionary Oil to improve your skincare routine, and more!

Our skin is under permanent assault from pollution and toxic elements in the environment. Indeed, the effects of pollution and makeup habits on our skin are profound, seen as increased skin sensitivity, inflammation and as a result, premature skin aging.

We are today able to measure not only how the cells react to different pollutants, but also which ingredients can protect them against the negative effects that cause inflammation, a major skin concern Universkin experts have been fighting against since 2006.

Air pollution is not just affecting skin on a cosmetic level but also poses a real threat to skin health. Skin barrier function and skin hydration are among the most immediate and significant threats air pollution imposes on our skin.

As the foundation of any good skincare regimen is cleansing, Universkin designed nexultra O, a Universal cleansing oil formula, made for all skin types, concerns and environmental conditions. True to the saying that “less is more” we believe there is no need to complicate your beauty routine to get efficacy; On the contrary, the idea was to simplify it all and create one product that could take care of all your cleansing needs.

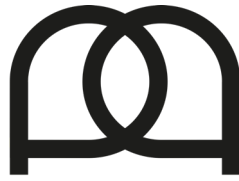

Indeed, nexultra O works to attract and remove positively charged toxins (pollution nanoparticles, heavy metals and free radicals) from the skin, for a truly deep cleanse. As a universal Oil, it not only efficiently washes away skin impurities, but is also effective on stubborn makeup, eliminating the need for double cleansing. nexultra O will help you achieve a soft, smooth complexion thanks to olive oil that naturally fortifies and strengthens the skin’s natural protective barrier.

In addition, olive oil is proven to be an essential ingredient not only for the skin but also for the hair and scalp, especially if you have dry and itchy hair as it will keep it hydrated. It is a rich source of antioxidants which help promote scalp health while neutralizing free radicals. Its moisturizing properties help seal your hair cuticle by forming a protective barrier over your hair shaft. Also, it acts as a DHT (dihydrotestosterone) blocker which helps inhibit hair loss, encouraging healthy hair growth and strength.

OUR FORMULA:

- Made of 65% of the best cold pressed and unrefined extra virgin oil, that offers the distinct benefit of cleansing gently while maintaining the skin barrier
- 5% camelina oil
- Contains a biomimetic peptide, Kollaren, which play several roles in skinrepair and function
- Plant Co2 extract to purify
- Omega 3 bio transformed by camelina oil to sooth

UNIVERSKIN

DID YOU KNOW?

In the 1950's, inspired by the ancient Asian practice of using oil to cleanse skin, make up artists from Hollywood began using oil to remove make up. Today, cleaning your skin with an oil is a makeup artist staple but even highly recommended by Dermatologists to protect against the damage and repair the affected skin areas as much as possible.

Oil cleansing is a way of deep cleansing your skin without stripping it of all its essential moisture it needs. The oil cleansing method operates on the premise that "oil dissolves oil", absorbing impurities and nourishing the skin to keep it balanced. On the contrary, when you use harsh , super micellar foaming cleansers, you are actually just moving dirt, grime and oils around your skin while disrupting your skin barrier. Indeed micellar waters are often marketed as perfect for skin sensitive skin due to the" high water content", but truth is, they contain high proportions of ingredients like butylene glycol known to cause skin irritations, dermatitis or skin allergies, and other chemicals that weaken protein and cellular structure!

HOW TO USE IT ON THE SKIN?

Universkin recommends a simple 4-Step Oil Cleansing method

- Dispense 2-3 pumps into dry or wet hands
- Massage into dry skin, including eye area
- Add water and massage skin to emulsify the oil, creating a gentle cleansing foam
- Rinse your face thoroughly and pat dry with a soft towel. Follow by applying your overnight antioxidant serum for an optimal combo

For long-wear and waterproof eye makeup, first dispense 1 pump onto a wet cotton pad and gently press the eye area for 5-10 seconds. Gently wipe outwards and repeat if necessary. Follow with the 4-Step Oil Cleansing Method.

HOW TO USE IT ON THE HAIR & SCALP?

- Massage a small amount of oil thoroughly into the scalp to improve the blood circulation
- Cover your head with a shower cap and leave it for 30 min to an hour, or overnight
- Wash your hair, as usual with a natural shampoo and rinse off
- Avoid applying conditioner

Universkin is the story of a group of doctors who worked hand in hand to find the best treatment to take care of the skin needs of their patients. Through their everlasting hard work, they reinvented skincare by destructing and reconstructing the current offer and create the 'one-to-one' solution of Universkin. Convinced about the unique energy in each of us, which we believe can be revealed through a new generation of cosmetics, Universkin continues to evolve and grow its global presence while remaining in its founding principles: Provide a healthy skin and tailored service to its community of consumers.
